Name: Jaryd Meek

Task1 (what is it): Task2 (what is it):

Enter Distance   Find in-stock
Pick Store   Product

Tester (name):

Noah

Observations (both the tester's observations and your observations as designers):

- The enter zipcode Box looks too much like the submit button

- having just a list of locations isnt as useful since it doesn't give the direction

- Having the seller on the main results page is unnecesary

- Having the rating under description isnt great vb

What would you change about your design based on the observations?

- add map to store results data so user knows direction of store

- change look of zipcode Bar

- move Rating above description.
